

# Ecclestone Drive (Muskoka Road 16) Reconstruction

Client: District Municipality of Muskoka

Year: 2016 - 2017

## SERVICES PROVIDED

Ecclestone Drive is a 1.5km urban arterial road that is adjacent the Muskoka River and connects Highway 118 to downtown Bracebridge. CCTA was retained by The District Municipality of Muskoka to complete the design and provide contract administration and construction inspection services during construction. The work included widening of the road platform to include asphalt shoulders, additional sidewalks, bus stop lay-by lanes, a new storm system, replacement of failing clay sanitary sewers, replacement of old cast and ductile iron water mains, and a significant lowering of the road in a section where slope stability concerns were identified. The latter required significant rock excavation below the road and along the vertical rock face adjacent to the road on the east side. Also included was minor rehabilitation of the three bridges in the project area.

Key Staff: Bill Van Ryn, Evan Mook, Dave Thomson, Greg McLachlan
