

## Lutterworth Pines Water Works

Client: Township of Minden Hills

Year: 2007 - 2010

### SERVICES PROVIDED

Lutterworth Pines is a 28-lot mobile home facility in the Township of Minden Hills. In 2006, the Ministry of the Environment (MOE) ordered the Township to assume responsibility (ownership and operation) of the privately-owned and operated drinking water facility. The sub-standard facility was not meeting numerous regulatory requirements. In 2007, the Township retained CCTA to design a new drinking water supply, treatment and distribution system. The project included: hydrogeological and geotechnical investigations; preliminary and final design, including the design of a uranium removal system; assisting the Township in obtaining funding; securing all approvals; liaising with property owners for property acquisition; liaising with the MOE to remove the requirement to complete a Class Environmental Assessment; tendering of two construction contracts; and contract administration and inspection. Construction of the \$600,000 project was successfully completed in 2010 on schedule and under budget.

Key staff: Rod Langford, Suzanne Troxler, Bill Van Ryn, Greg McLachlan
