

Intrawest Village at Blue

Client: Intrawest Placemaking

Year: 2007

SERVICES PROVIDED

This celebrated project involved preparing and implementing a Master Servicing Plan for a total of 1,200 hotel/condo units and 10,000 square metres of commercial floor space at the base of the picturesque Blue Mountain Resort. The work incorporated existing and new infrastructure surrounding the expanding resort community. CCTA is extremely proud of their achievement on this truly unique site development project. Major infrastructure works included the installation of a 1800 mm diameter trunk storm sewer and construction of an aesthetic pond feature to replace an existing stormwater management pond.
