

Port of Orillia Dock Upgrades

Client: City of Orillia
Year: 2009-Present

SERVICES PROVIDED

CCTA was retained by the City of Orillia to inspect the existing docks and provide options for repair or replacement. It was determined the docks were at the end of their useful life (30+ years) and should be replaced. Three layout options and cost estimates were provided to the City.

CCTA subsequently prepared a design build tender for the preferred option chosen by City Council, and in 2012 the \$2.9M project was completed, providing 220 new slips complete with shore power, lighting and water servicing.
