

Fire Training Facilities

Client: Various

Year: Various

SERVICES PROVIDED

CCTA structural engineers have conducted a number of structure inspections and evaluations of fire training facilities. During the last five years, CCTA has conducted annual structural inspections for the burn building and smoke tower at the Ontario Fire College in Gravenhurst. We recently conducted similar inspections and evaluations for the City of London, Ontario Power Generation, and Bruce Power. These inspections are undertaken to evaluate the condition of the structures and suitability for continued use. Structural deficiencies and safety concerns are identified, and recommendations are made for improvements and future maintenance.
