

## Innisfil Water Treatment Plant

Client: Town of Innisfil

Year: 2007

### SERVICES PROVIDED

The project encompassed a major expansion of the original water treatment facility designed by CCTA in 1994. Three separate additions were constructed, to the office area, garage area and process area. The structure consisted of a structural steel frame with OWSJ roof framing and precast concrete exterior wall panels. The process area addition is founded on an extension of the reinforced concrete reservoir and contact chamber.

Key Staff: Terry Smart, Mike Sanfilippo
