

Lagoon City Pedestrian Bridge Assessment

Client: Township of Ramara

Year: 2008 - 2009

SERVICES PROVIDED

Lagoon City is located on the east shore of Lake Simcoe and includes residences fronting on a network of interior man made canals. Wood suspension bridges constructed approximately 20 years ago provide pedestrian crossings of the canals at two locations.

CCTA was retained to undertake a complete structural assessment of the bridges. Visual observations and the analysis of wood cores resulted in recommendations for immediate and long term repair/replacement solutions.

CCTA was subsequently retained to prepare quotation documents for immediate repairs to the south pedestrian bridge, to be completed in the spring of 2009.
