

Echo Valley Road & Highway 60 Improvements

Client: Echo Valley (Huntsville) Developments Ltd.

Year: 2008 - 2009

SERVICES PROVIDED

In May 2006, C.C. Tatham & Associates completed a Traffic Impact Study for the proposed Echo Valley residential subdivision in the Township of Lake of Bays. As part of this study, the need was identified for turn lanes on Highway 60 at Echo Hills Road to serve the site. In 2008, CCTA was retained to complete an Environmental Screening Report to satisfy the Environmental Assessment requirements of the Ministry of Transportation. The report documented improvement alternatives and established the preferred alternative based on impacts to the surrounding lands and Boyne River wetland, cost, long-term maintenance and constructability. Subsequent to this, we prepared preliminary and detailed design drawings for the improvements, in addition to cost estimates and contract documents. As Highway 60 is a provincial highway, MTO approvals were obtained (through a continuous review and consultation process with MTO). Construction of the road improvements is expected in 2010.
