

University Avenue Extension

Client: City of Orillia

Year: 2008 - 2009

SERVICES PROVIDED

The City of Orillia engaged CCTA to undertake a Schedule C Class EA and design for this new 5-lane arterial roadway. This extended West Ridge Boulevard by 1.6 km and opened up a new business park area, accommodating the new Orillia home of Lakehead University and the City's much-in-demand, new ice pad and soccer sports complex. Included were deep installation municipal trunk services and a fully landscaped 6 ha stormwater management pond, all designed to support the ultimate build out of the area. CCTA's responsive staff were also awarded the tasks of inspection and contract administration, opening the fully operational roadway in the fall of 2009 at an awarded construction cost of \$6.6M.
