

Lakehead University

Client: Moriyama Teshima Architects

Year: 2008 - 2009

SERVICES PROVIDED

Lakehead University is developing a LEED Platinum satellite campus in Orillia which will eventually serve a student population of 7,000.

CCTA was retained to complete a Master Servicing Plan for the expected 20-year development plan, and subsequently completed the detailed site servicing, grading and stormwater management design for Phase 1. The stormwater management design utilized innovative SWM practices and integrated the SWM features into the overall design context which emphasized purposeful open spaces and aesthetic quality. Phase 1 of the campus will be completed in September 2010 at an estimated cost of over \$45M.
