

Permit to Take Water (PTTW)

Client: Various
 Year: Ongoing

SERVICES PROVIDED

CCTA provides assistance to a number of commercial water takers with Permit to Take Water monitoring requirements and with compliance parameters, including the following tasks:

- Installation and operation of continuous streamflow, reservoir and groundwater level monitoring stations
- Manual streamflow and water level measurements
- Water quality sampling
- Data management and analysis
- Preparation and submission of legislated annual monitoring and water taking reports

In 2006, we began assisting permit holders with electronic data submissions on the MOE internet-based Water Taking Reporting System (WTRS), in order for them to remain compliant with the new Water Taking and Transfer Regulation (O.Reg.387/04). In addition, we continue to work with permit holders on improving water taking efficiency and permit compliance through innovative monitoring strategies using state-of-the-art equipment.
